

GRP full-contact external floating roof

INSTALLATION

The NXT EFR is the state-of-the-art GRP external floating roof and represents a proven and corrosion-free alternative to external steel floating roofs. The NXT EFR features structural and design innovations unseen by any other design available on the market.

MANUFACTURING

DESIGN

- Excellent return on investment with a lifetime expectancy **equal to the tank** without maintenance
- Short installation time
- Anti-static, corrosion-free and UV resistant
- Full-contact design without pontoons
- Seamless unsinkable construction
- Excellent chemical resistance to virtually all products including electrically conductive liquids
- Strong flexible unibody construction suitable for harsh operational conditions
