

RD-FCV

RDFCV

Roof Drain Float Check Valve

Environmental
Protection Technology for
Storage Tanks GmbH

INSTALLATION

RDFCV is a unique roof drain float check valve allowing for a completely drained and residue-free drain system.

MANUFACTURING

DESIGN

R&D

- No flow reduction of rain water
- Immediate stop of liquid back-flow
- Zero pressure needed to close the valve
- Corrosion and hydrocarbon resistant materials
- Residue-free drainage of the roof
- Each valve is tested with kerosene to prove zero leakage
- Filter allows small debris to pass while stopping larger objects
- Easy Installation
- Available in DN80/3", DN100/4" and DN150/6"
